

Q12.Create HTML for form.png using bootstrap.

Ans.

The screenshot shows a web browser window with the title "To The New - Chromium". The address bar displays the file path "File | /home/nikhil/webapp/form.html". The browser has several tabs open: "Learning | Dashboard", "New Tab", "To The New", and "Bootstrap - Google Docs". The sidebar on the left contains various application icons. The main content area displays a "Bug Report" form. The form has a light gray header with the title "Bug Report". Below the header, there are several input fields: "Title\*", "Description\*", "Operating system:" (with a dropdown menu showing "Windows XP"), "Product:" (with a dropdown menu showing "Formod"), "Version:" (with an empty text box), "License:" (with radio buttons for "Free" and "Business"), "Security:" (with a dropdown menu showing "Critical"), and "Attachments:" (with a text box and a "Choose file" button). At the bottom right of the form is a "Send" button. The browser's status bar at the bottom shows "Home Quick Help".
